Generative AI Engineer | AI/ML Engineer | AI-Focused Software Engineer

Summary

Computer Science graduate with internship experience building GenAI, machine learning, and backend systems at GlobalLogic, the National University of Singapore, and Panasonic India. Strong in Python, SQL, RAG, ML model development, and FastAPI, with measurable work in fraud detection, enterprise AI, and API automation.

Technical Skills

Languages: Python, SQL, Go

ML: scikit-learn, PyTorch, XGBoost, pandas, NumPy, Qdrant, feature engineering, model evaluation

GenAI: LLMs, RAG, NLP, tokenisation, embeddings, Transformers, vector search, prompt engineering, tool calling, LLM evaluation

Backend and Tools: FastAPI, REST APIs, PostgreSQL, SQLite, Git, Docker

Core CS: DSA, OOP, DBMS

Experience

GlobalLogic, a Hitachi Group Company

Noida, India

GenAI Engineer Intern

Jan 2026 – May 2026

- **Delivered 181 of 251 story points across four sprints** by building FastAPI and SQLite backend services, local-LLM workflows, reporting modules, and integration features for an offline enterprise code-analysis platform.
- **Enabled four-stage code, security-risk, ROI, and business analysis** by implementing reusable AI workflows with hash-based change detection to avoid reprocessing unchanged files.
- **Improved deployment readiness by identifying 61 security issues** and building **3 MCP tools and 6+ reusable resources** with validated schemas, controlled permissions, and audit-friendly execution.

National University of Singapore

Singapore

Academic Intern – Applied ML with Generative AI

Dec 2025 | [GitHub](#)

- **Achieved 0.92 F1-score and 0.96 ROC-AUC on 86,777 transactions** by converting tabular records into contextual text, generating DistilBERT embeddings, and fine-tuning GPT-2 with LoRA.
- **Reduced trainable parameters to approximately 0.06%** through parameter-efficient fine-tuning, enabling transformer-based fraud classification on an NVIDIA RTX 3050 with about 4 GB VRAM.

Panasonic India – Miraie Platform

Gurgaon, India

Software Engineering Intern

Jun 2025 – Aug 2025

- **Reduced manual REST API testing effort by 45%** by automating repeatable validation workflows for smart-home platform features.
- **Enabled event-driven smart-home integrations** by developing and validating IFTTT triggers and actions using Go, REST APIs, ngrok, and pre-production services.

Projects

Enterprise RAG Intelligence Platform

May 2026 – Present | [GitHub](#)

Python, FastAPI, PostgreSQL, Vector Search, BM25, Reranking, Qdrant

- **Built an end-to-end RAG platform** that ingests PDF, DOCX, CSV, spreadsheet, and structured data; combines vector search, BM25, metadata filtering, and reranking; and returns evidence-linked answers.
- **Created a modular document-processing pipeline** for text extraction, semantic chunking, metadata capture, embedding generation, and indexed storage, exposed through FastAPI ingestion and query endpoints.
- **Improved answer reliability** by adding query routing, validated SQL generation, source attribution, and evaluation for Recall@K, MRR, groundedness, citation accuracy, latency, and tool-call success.

SentinXFL – Federated Fraud Detection

Dec 2025 – May 2026 | [GitHub](#)

Python, Flower, FastAPI, React, Federated Learning, Differential Privacy

- **Built a privacy-preserving fraud-detection platform** comparing centralized, local, FedAvg, median, and trimmed-mean training across distributed non-IID clients without centralizing raw transactions.
- **Reduced sensitive-data exposure** by implementing PII checks using column analysis, pattern matching, uniqueness checks, and configurable redaction before model training.
- **Validated reliability with 126 of 134 tests passing** while evaluating privacy at $\epsilon = 4.5$, convergence, poisoning attacks, and robust aggregation strategies.

Education

SRM Institute of Science and Technology

Chennai, India

B.Tech, Computer Science and Engineering – Software Engineering | CGPA: 8.2/10

Aug 2022 – May 2026

Certifications & Credentials

NUS School of Computing – Applied Machine Learning with Generative AI, Dec 2025
